Professional Summary

Aspiring Data Scientist with a strong foundation in Python, SQL, Statistics, Machine Learning, and Data Visualization. Skilled in data cleaning, analysis, predictive modeling, and developing data-driven solutions through academic and personal projects. Passionate about extracting insights from data, solving real world business problems, and continuously learning emerging technologies in Data Science and AI. Seeking an entry-level opportunity to contribute analytical skills and grow as a Data Science professional.

Education

Government College of Engineering — *Bodinayakanur, India*
B.E. in Computer Science and Engineering; CGPA: 8.30 — *Nov 2022 – May 2026*

Technical skills

Languages: Python, SQL, Java, C
Machine Learning & AI: Scikit-learn, XGBoost, Random Forest, Regression, Classification, Natural Language Processing (NLP), Model Evaluation, Feature Engineering
Data Analysis & Engineering: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA), Statistical Analysis, Data Visualization, Data Preprocessing
Databases & Visualization: MySQL, Power BI, Plotly
Tools & Technologies: Streamlit, Git/GitHub, Jupyter Notebook, Visual Studio Code, IntelliJ IDEA

Experience

Java Full Stack Development Intern — *Chennai, India*
FemtoSoft Technologies — *July 2025 – August 2025*

- Developed and maintained web application modules using Java, MySQL, HTML, CSS, and JavaScript. Implemented database operations and integrated backend services with frontend components.

Data Science with Python Intern — *Madurai, India*
Skillforge — *March 2025 – April 2025*

- Worked with Python, Pandas, NumPy, and Scikit-learn to perform data preprocessing, cleaning, and feature engineering on structured datasets. Conducted exploratory data analysis (EDA) and statistical analysis to identify trends and support data-driven decision-making.
- Trained, evaluated, and optimized machine learning models using appropriate performance metrics. Gained hands-on experience in implementing end-to-end machine learning workflows, including data preparation, model development, and result interpretation.

Projects

Credit Risk Prediction | *Python, Scikit-learn, Pandas*

- Developed a binary classification pipeline on financial datasets by performing data preprocessing, feature engineering, and exploratory data analysis to improve credit risk assessment.
- Trained and evaluated multiple machine learning models using Scikit-learn, optimizing classification performance through hyperparameter tuning and evaluation metrics.

Sentiment Analysis | *Python, Scikit-learn, NLP*

- Built an NLP-based text classification pipeline for disaster-related tweets using text preprocessing, TF-IDF vectorization, and machine learning classifiers.

Thozhan – *AI-Based Crop Demand & Yield Prediction System* | *Python, XGBoost, Random Forest, Streamlit* | Live Demo

- Developed an end-to-end machine learning platform by processing *4.9 million+* agricultural records to predict crop yield, production, demand, rainfall, and market prices using XGBoost and Random Forest models.
- Engineered data preprocessing pipelines, feature engineering, and model evaluation workflows, achieving an F1-score of *0.86* for demand prediction; deployed an interactive Streamlit dashboard with Plotly visualizations and MySQL integration for real-time district-wise agricultural insights

Certifications

- **DBMS** – *NPTEL*
- **Python for Data Science, AI & Development** – *Coursera*
- **Data Analysis with Python** – *Coursera*
- **Machine Learning with Python** – *Coursera*
